

PTS 31

THE NEXT STEP IN BOATING PLEASURE

PTS 31

The PTS 31 is proof that eye-catching design and optimum functionality are the perfect combination. In this Vripack design, the family bond with our PTS 26 can be easily recognized and yet the boat most certainly has its own character. Much attention has been paid during development to the most effective use of space: Hence the helm and passenger seating is designed in such a way that they can be transformed into 2 benches in no time. The cabin has headroom and is light and airy thanks to a large glass roof hatch that can be opened. The galley and the wet room are spacious and

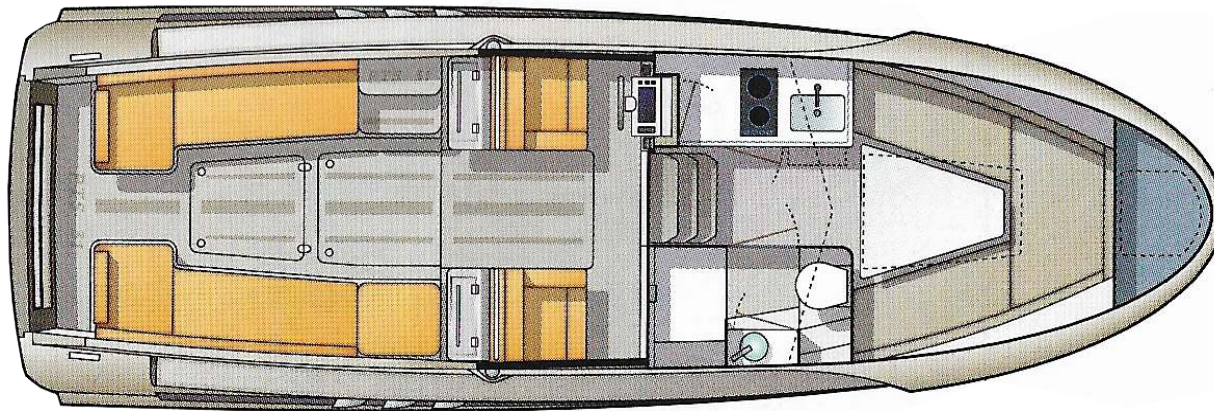

beautifully styled. The interior is modular to accommodate the specific wishes of the new owner. The underwater hull shape is semi-planing, which means that manoeuvring is excellent at both higher and low speeds. The ship has a playful character due to a glass mirror aft that can be opened at the push of a button to allow aft access onto a pontoon from the stern in addition to the usual side access. Seeing the water through the stern also increases the on-the-water experience. The low maintenance materials include Esthec deck as standard leaving you more time to cruise.

TAILOR-MADE FOR YOU

The PTS 31 is being built in Schagen, an hour from Schipol International airport, by a permanent team of young, skilled and motivated employees. In consultation with the future owner, the boats are built to your individual specification with regard to the colour of the hull, cushions, hood, waterline,

seating and even deck covering. Each PTS 31 is tailor-made to order and as a new owner you will be very welcome to visit at any time to monitor progress on site. A trial run is of course also possible in advance of making a commitment! Please call the yard or one of our agents to make an appointment today.

SPECIFICATIONS

| | |
|---------------------------|--------------------------------------|
| DESIGN | Vripack Naval Architects |
| LENGTH OVERALL | 9,50 metre (31 feet) |
| BEAM | 2,98 metre (9,8 feet) |
